

Institute of cell therapy

Kiev (Ukraine)

Stem cells are one of the most surprising discoveries of our time, thanks to which humanity has a real chance to cure a wide range of diseases that were previously considered to be untreatable. The institute of Cell Therapy was founded in Kiev in 2003. Today it is the largest medical facility specialized in research, treatment and diagnostics in the field of cell therapy.

The rooms of the institute were redecorated and look like real hotel rooms with a very high level of finish. The Hilo box spring beds and Olympia Soft beds of Haelvoet contribute to this relaxing atmosphere. Very nice project!

Scope of the project: 20 rooms

Date: Spring 2018

Products

Olympia Soft

Hilo box spring

Olympia Hospital II
